

Design for Good

Perception

We could perceive Blossom to be lots of different things, and how we want Blossom to be perceived influences our design.

First, let's plan how we want to prioritise our different design considerations.

We want Blossom to look...	Ranking (1-4)
Smart	
Kind	
Helpful	
Aesthetic	

Research some materials, give three suggestions of materials you perceive as whatever your most important design consideration is

Material	Score X/10
Smart	
Kind	
Helpful	

Design for Good

Sustainability

We want our skin to be sustainable, but sustainability can be broken down into a few categories.

Let's do some research on each of our materials and begin to score them for sustainability.

Material	Where did it come from?	Is it recyclable?	Is it durable (how long will it last)?	Score (X/10)

Design for Good

Equity

We want our skin to be equitable, again, equity has different considerations.

Let's do some research on each of our materials and score them on how equitable the material is.

Material	Cost for 1 Blossom skin	Will all places in Australia have access	Is it easy to use/design a skin	Score (X/10)

Design for Good

Choosing a skin

Now that we've given a score for each of our skins for perception, sustainability and equity, add the scores up and writes some notes to present to the class on why your material should be used.

Material	Score (X/30)	Why it's well perceived	Why it's sustainable	Why it's equitable
(Best material)
